DATA QUALITY REPORT - COMPLETENESS OMISSION ►

MEASURE DESCRIPTION Es importante señalar que para el establecimiento de una Área Natural Protegida Federal deben realizarse estudios de campo y la delimitación de sus vértices se realiza con la ayuda de geoposicionadores. En gabinete es elaborada la descripción límite analítica-topográfica que posteriormente será expresada mediante un decreto presidencial que las delimita. La información aquí presentada se elaboró tomando como base información del INEGI y que ha desarrollado la CONANP empleando el SIG.
